Six Tips for Great Poster Design!

Your poster design is crucial! It needs to be eye-catching, have impact, and it must get your message across instantly!

With decades of advertising experience - we at Positive Media Marketing understand what it takes to make your poster 'jump out'. Follow our six simple tips - which have been proven to deliver the best results!

1. Text

Text should be short & sweet in order to keep the poster message clear and concise. This will maintain the visual impact of the poster.

2. Images

Images need to be centred and act as the main focus to draw the audience in. They need to be bold, eye-catching and relevant to your brand. *But remember not to over do it... less is more!*

3. Colours

Use bold colours which will stand out. Try not to use too many or your advert may appear too busy.

4. Logo

Your poster should feature your company logo to ensure brand recognition. So that your audience to remember your logo, make sure it is clear and stands out.

5. Layout

The layout should be professional & clean and able to be read quickly by your audience. Designers tend to read in a 'Z' pattern, when positioning text and images.

6. Call to action

Your poster needs include a strong call to action! Think what you want people to do after seeing your poster and ensure details such as website, business address, phone number and email are clear.
